Satellite Technology Seminar for STAR Program
Control Electronics & Control Dynamics (ISRO)

Two scientists of ISRO (Indian Space Research Organization) came to Japan and stayed on JAXA's Sagamihara campus to give several lectures about Control Electronics and Control Dynamics from August 5 to 14, 2009.

The lectures of Ms. Lekshmi and Mr. Siva were well structured and comprehensive.

All the STAR participants were very impressed with the contents and appreciated their intensive lectures.

Needless to say, they were greatly benefited from those lectures.

We would like to express our great appreciations for providing lectures for the STAR program participants and we hope that we could have such a wonderful opportunity again in the future.

UN/Austria/ESA Symposium on Small Satellite Programs for Sustainable Development (8-11 Sep. 2009) @Graz, Austria

UN/Austria/ESA Symposium on "Small Satellite Programs for Sustainable Development" was held in Graz, Austria from September 8 to 11, 2009.

Mr. Tsuji was asked to attend this symposium as one of presenters for "Utility of Small Satellites for Capacity Building" and he gave a presentation on the STAR Program in "Small Satellites – A Driver for Capacity Building" session.

Moreover, a hands on activity on mission design was scheduled in the program, too.

There were a lot of experts and participants of each country got together and gave many interesting presentations regarding the small satellites and other related issues.
