

National framework

SDGs is widely accepted “To-Do list for people and earth”

In Jan 2016, the 3rd National Basic Plan for Sustainable Development was adopted to adapt the SDGs (17 goals and 169 targets) to the Korea’s context.

KARI space programs

The KARI contributes the realization of 7 SDGs, and our space programs are one of the instrument to help them do that.

KARI International Space Training (IST) program

- Lectures on space policy, satellite, launch vehicle, space exploration, and etc.
- 26 participants from 16 countries in 2017

Korea Augmentation Satellite System (KASS)

- Improve positioning accuracy to within 3 meters.
- Contribute economic productivity and improve quality of infrastructure

Earth observation

- **CHOLLIAN** satellite: monitor floods and fires, helping us improve emergency response services and our daily lives.
- **Two** geostationary satellites are planned to be launched in 2018 and in 2019: **meteorological** mission and **ocean monitoring** mission .
