

Space Policy in response to their national requirements and future cooperation in the region.

Malaysia Space Policy has the mission of **building the national space capability** to support economic development, advancing knowledge and societal well being.

**5th THRUST** : Increase and Strengthen international networking and cooperation

National needs in building space capability are expressed in  
**THRUST 1-3: Governance, infrastructure and expertise**

**THRUST 4: Contribution to economic development and societal well being**
