

Paradigm Change

◆ Space as a basis for “Solution”

- Easier access to space (small satellites)
- Affordable constellation and explosive increase of data
- Powerful tool for data analysis (AI, IoT, Cloud Tech.)

Chances for Emerging Countries

- ◆ Affordable Access to Space
- ◆ Solution for Challenges

Policy Direction

◆ Create New Value of Space Utilization

- Improvement of business environment
- Participation of broader experts
- Cultivation of “user” and “user needs”
- Innovative idea

Open Architecture for
Government-owned
Satellite Data

Demonstration Project

Support for New Entry

Competitive Industries

- Capacity building
using Japan’s space
asset

Deployment of Philippine microsat
from ISS/Kibo ©JAXA/NASA

- Education of young
generation

Cansat/model rocket program

- Internationally shared constellation
of small satellites

Cubesats developed by
students from Bangladesh,
Ghana, Mongolia, Nigeria
and Japan
