

### New Members of the STAR Program

3 new participants joined the STAR Program in October.

☆ Mr. Kim from KARI(Korea)

He came to Japan on 5<sup>th</sup> Oct and he will stay over 1 year. We were delighted with his long stay very much. He was responsible for structural static analysis at KARI and he is going to be involved in structure subsystem development of the Micro STAR. He hopes to contribute to this international cooperation program and share much information with other Asian young engineers.

*Mr. Kim*

Also, during his stay in Japan, he wants to feel Japanese culture and take trips to countryside with his family. These days, he also enjoys playing soccer at a lunch break with some of the JAXA staff at Sagami-hara Campus.

*Mr. Adi*

*Mr. Irwan*

☆Mr. Adi from LAPAN(Indonesia)

He arrived at the JAXA Sagami-hara Campus on 16<sup>th</sup> Oct. This is the second time he participated in the STAR Program because he did last year(Jun-Jul). He is an expert on computer science and he was in charge of mechanical and electrical work at LAPAN. He has a hope to develop the embedded system in this time.

Even though it is getting colder at Sagami-hara now, sometimes he still wears a half-sleeve shirt. We hope he will get over and enjoy the winter in Japan.

☆Mr. Irwan from LAPAN(Indonesia)

He visited Japan on 21<sup>st</sup> Oct, he is really a newcomer. His major is telecommunication and he wants to learn a lot besides his major, for example the structure of the STAR Program. His stay is very short (about 1 month), however, he is highly motivated. Also, he is greatly excited about the life in Japan because this is his first visit to Japan and abroad as well. This experience will be very valuable for him.

*STAR Team Members*
